

# Shayan Golestanipour

[g.shayan5529@gmail.com](mailto:g.shayan5529@gmail.com) ❖ (+98)935 383 5262 ❖ <https://shayangstp.vercel.app>

Experienced software developer seeking opportunities to join enterprise-level software development teams and contribute to large-scale projects .

## WORK EXPERIENCE

**Rahpoo(Parsian DA)** **July.2023 - Present**  
*Senior FrontEnd Engineer* *hybrid*

- Designing a SaaS web application with Next.js and TypeScript, integrating a payment panel, and implementing a UI design with a ticketing system .
- Designing a front-end QC Dashboard with React and TypeScript, integrated with AI to generate text-to-speech (TTS) and speech-to-text (STT) functionalities. Led a team of four to develop the QC dashboard and a SaaS product

**KavehGlass.CO** **Apr.2023 – June.2024**  
*FullStack Engineer* *tehran*

- Developing a React Automation App and spearheading the front-end design for multiple features with Redux .
- Migration and refactoring front-end of AVL web application from Angular.js to React.js, ensuring Progressive Web App (PWA) compatibility. Integrating ReactLeaflet for map rendering and implementing auth with JWT .
- Designing a new order-tracking application built with React.js, Express.js, and SQL as the backend database .
- Migration and redesigning Koreh management app from Angular.js to React.js, while maintaining the REST API with Express.js and utilizing MongoDB as the database .

**Sdvas** **Sep.2022 – Mar.2023**  
*FrontEnd Engineer* *tehran*

- Developed an open-source app utilized by the main client, GSI, for rendering GIS data .
- Worked with Geo-server for rendering maps, customizing styles, and integrating plugins to enhance functionality and performance for large datasets. Technologies used include ReactJS, ExpressJS, microservices, and SQL .

**Botik** **Feb.2022 – Aug.2022**  
*FullStack Developer* *remote*

- Developing and designing an e-commerce B2C platform using Next.js as a full-stack solution with TypeScript .

## EDUCATION

**Azad university Qazvin** **June.2016**  
*Industrial engineering* *Qazvin*

- Proficient in understanding industry needs , familiar with company operations , and factories system of work .
- Experienced in project management for business, adept at integrating technology into app development with an industrial engineering perspective, Bringin industrial engineering expertise to programming .

## SKILLS & INTERESTS

- **Skills :** Reactjs, Nextjs, Typescript, Nodejs, Expressjs, SQL, MongoDB, Redux, Material UI , Bootstrap , TailwindCss , AntD , PWA and Agile methodologies , Responsive Design, Scrum , design-patterns .
- **Interests :** Running, Books, open-source, Crypto, language learning .
